DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15, line 2, it is unclear. Is the battery flexibly connected to the main housing?
or the receptacle assembly

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis (U. S. Patent 5,771,305)

As to claims 1 and 6, Davis discloses an audio-equipment as shown in figures 1-9 comprising a housing (12). The housing contains an audio circuitry (column 2, lines 61, 67) that installed within the housing, and having first and second protective bars (figures 1-4, bag compartment including handlebars) connected to the housing (column 4, lines 38, 42, and 50). Davis does not teach the protection bars in form of flexible. However, the relative term is flexibility in particular since virtually anything will flex if

enough pressure is applied to it. –Fredman v. Harris-Hub Co., Inc. (DC NIII) 163

USPQ 397 (column 2, lines 57-61, column 3, lines 1-11, column 4, lines 52-62).

As to claim 2, Davis discloses an audio equipment as shown in figures 1, 4, 7 further comprising a handle (14) attached to the protective bars (column 3, lines 12-13).

As to claims 3-5, Davis discloses an audio equipment as shown in figures 4 and 8 further comprising a connector assembly (48, 56a) flexibility connecting the protective bar to the housing, and also comprises a flexible gasket (60) (column 2, lines 58-60).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davis in view of Rorer (U. S. Patent 4,239,841).

As best understood to claims 15-18, Davis teaches all the limitations of the claimed invention as above, except for showing a receptacle assembly structure for receiving a battery connected to the main housing. Rorer discloses an electronic assembly as shown in figures 1-4 having a receptacle assembly (26) (column 2, lines 25-26) having a receptacle housing. The assembly also includes a flexible gasket (30) making of elastomeric material that is disposed between the receptacle housing and the main housing and at least one retainer (34) that is disposed on the housing. It would have been obvious to one of ordinary skill in the art at the time the invention was made to

modify the electronic equipment of Davis and provide the structure of receptacle assembly for containing the battery as taught by Rorer in order to support the secondary power of housing for electronic device when the electrical power is unplugged. Also the gasket and retainer are used for protecting housing and absorb shocking from the housing to the battery.

As to claims 19-20, Davis discloses an audio equipment which is well known in the art comprising a door for receiving a battery and connected to the housing, also, the door has a spring which is disposed to bias a battery in the receptacle assembly.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wells, Villanueva et al, Lenihan et al, Hinojosa disclosed related art.
